

Failed Delivery and Consignee Contact SOP

AfaqRoute Logistics Services Co. (ARLS) | Saudi Arabia Operations

Document ID	ARLS-DLV-SOP-003	Owner	Last Mile Operations Lead
Effective	01-Jul-2026	Next review	01-Jul-2027
Version	1.0	Classification	Internal

Purpose

To define evidence, customer-contact, redelivery and escalation requirements after a failed delivery attempt.

Scope

Applies to B2B and B2C delivery attempts managed by ARLS or subcontracted carriers within Saudi Arabia.

1. Acceptable failure reasons and evidence

Reason	Minimum evidence
Consignee unavailable	Attempt timestamp, delivery location and call attempt
Incorrect/incomplete address	Driver note plus address/location evidence
Consignee refused shipment	Reason for refusal and driver record
Site closed / access denied	Site or gate/security evidence
Payment/document condition not met	Specific condition and responsible party
Vehicle/access restriction	Restriction details and delivery-site information

2. First-attempt process

- Driver records the failed-attempt reason immediately.
- Control Tower validates contact details and delivery instructions.
- At least two contact attempts should be made using available channels within 30 minutes when operationally reasonable.
- A second attempt should be dispatched only after a revised window or corrected condition is confirmed.

3. Redelivery and escalation

Event	Action
1st failed attempt	Reschedule if consignee confirms availability.
2nd failed attempt	Account Owner approval required for further attempt unless contract states otherwise.
Customer refuses cargo	Hold pending disposition instruction; preserve evidence.
No contact for 24 hours	Escalate to Account Owner and Customer Service Lead.
Temperature-sensitive or secure cargo	Immediate Duty Manager notification.

4. SLA treatment

- Do not automatically exclude failed-delivery time from SLA; the contract must support any pause or exclusion.

- Record the exact attempted-delivery timestamp because it may be used in SLA and penalty review.
- A revised appointment must not overwrite the original contractual promised-delivery timestamp.

Records and audit trail

All material actions, timestamps, approvals, customer notifications and supporting evidence must be recorded against the shipment or incident reference in the transport management system.

Control note

This internal document does not replace Saudi laws, customs instructions, carrier terms, customer contracts or directions issued by competent authorities.
