

High-Value Shipment Control Policy

AfaqRoute Logistics Services Co. (ARLS) | Saudi Arabia Operations

Document ID	ARLS-RSK-POL-009	Owner	Risk and Security Manager
Effective	01-Jul-2026	Next review	01-Jul-2027
Version	1.0	Classification	Internal

Purpose

To establish additional controls for shipments with material financial exposure, theft risk or customer-critical cargo.

Scope

Applies to shipments with declared value of SAR 500,000 or more, or lower-value cargo designated high-risk by an account/security plan.

1. Mandatory controls

- Verified carrier and driver/vehicle details before dispatch where applicable.
- Confirmed consignee contact and delivery window.
- Milestone monitoring at every planned handoff.
- No material rerouting without Duty Manager approval.
- Immediate escalation for unexplained stop, seal/security issue, lost tracking or failed secure delivery.

2. Exception escalation

Event	Maximum internal response time
Tracking lost >60 minutes during active movement	15 minutes
Unexpected stop >2 hours	30 minutes
Border/customs hold without confirmed cause	30 minutes
Failed delivery	15 minutes
Suspected loss, theft, tampering or seal issue	Immediate security escalation

3. Customer communication

- Do not disclose unnecessary security controls, driver personal data or sensitive route details.
- Communicate confirmed status, issue, service impact, next action and next update time.
- Security incidents use the incident-response channel rather than normal shipment commentary.

Records and audit trail

All material actions, timestamps, approvals, customer notifications and supporting evidence must be recorded against the shipment or incident reference in the transport management system.

Control note

This internal document does not replace Saudi laws, customs instructions, carrier terms, customer contracts or directions issued by competent authorities.
